

Monitoring of MPI-ESM, MPI-ICON and EMAC CMIP6 Simulations with the ESMValTool

Lisa Bock, Björn Brötz, Veronika Eyring und Axel Lauer

Deutsches Zentrum für Luft- und Raumfahrt (DLR), Institut für Physik
der Atmosphäre, Oberpfaffenhofen, Germany

Projektreffen CMIP6-DICAD
DKRZ Hamburg
24 January 2017

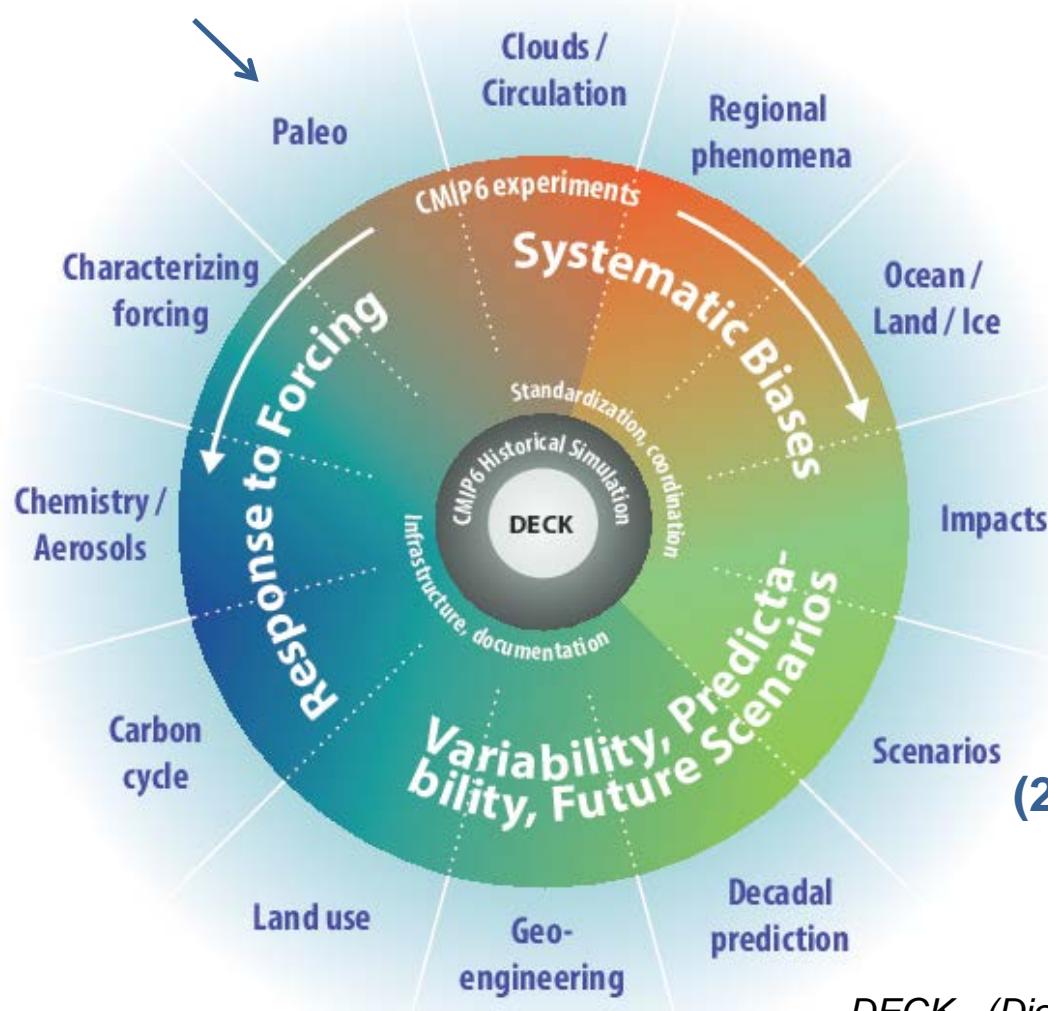

Knowledge for Tomorrow

CMIP: a More Continuous and Distributed Organization

(3) CMIP-Endorsed Model Intercomparison Projects (MIPs)

(1) A handful of common experiments

DECK (entry card for CMIP)

- i. AMIP simulation (~1979-2014)
- ii. Pre-industrial control simulation
- iii. 1%/yr CO₂ increase
- iv. Abrupt 4xCO₂ run

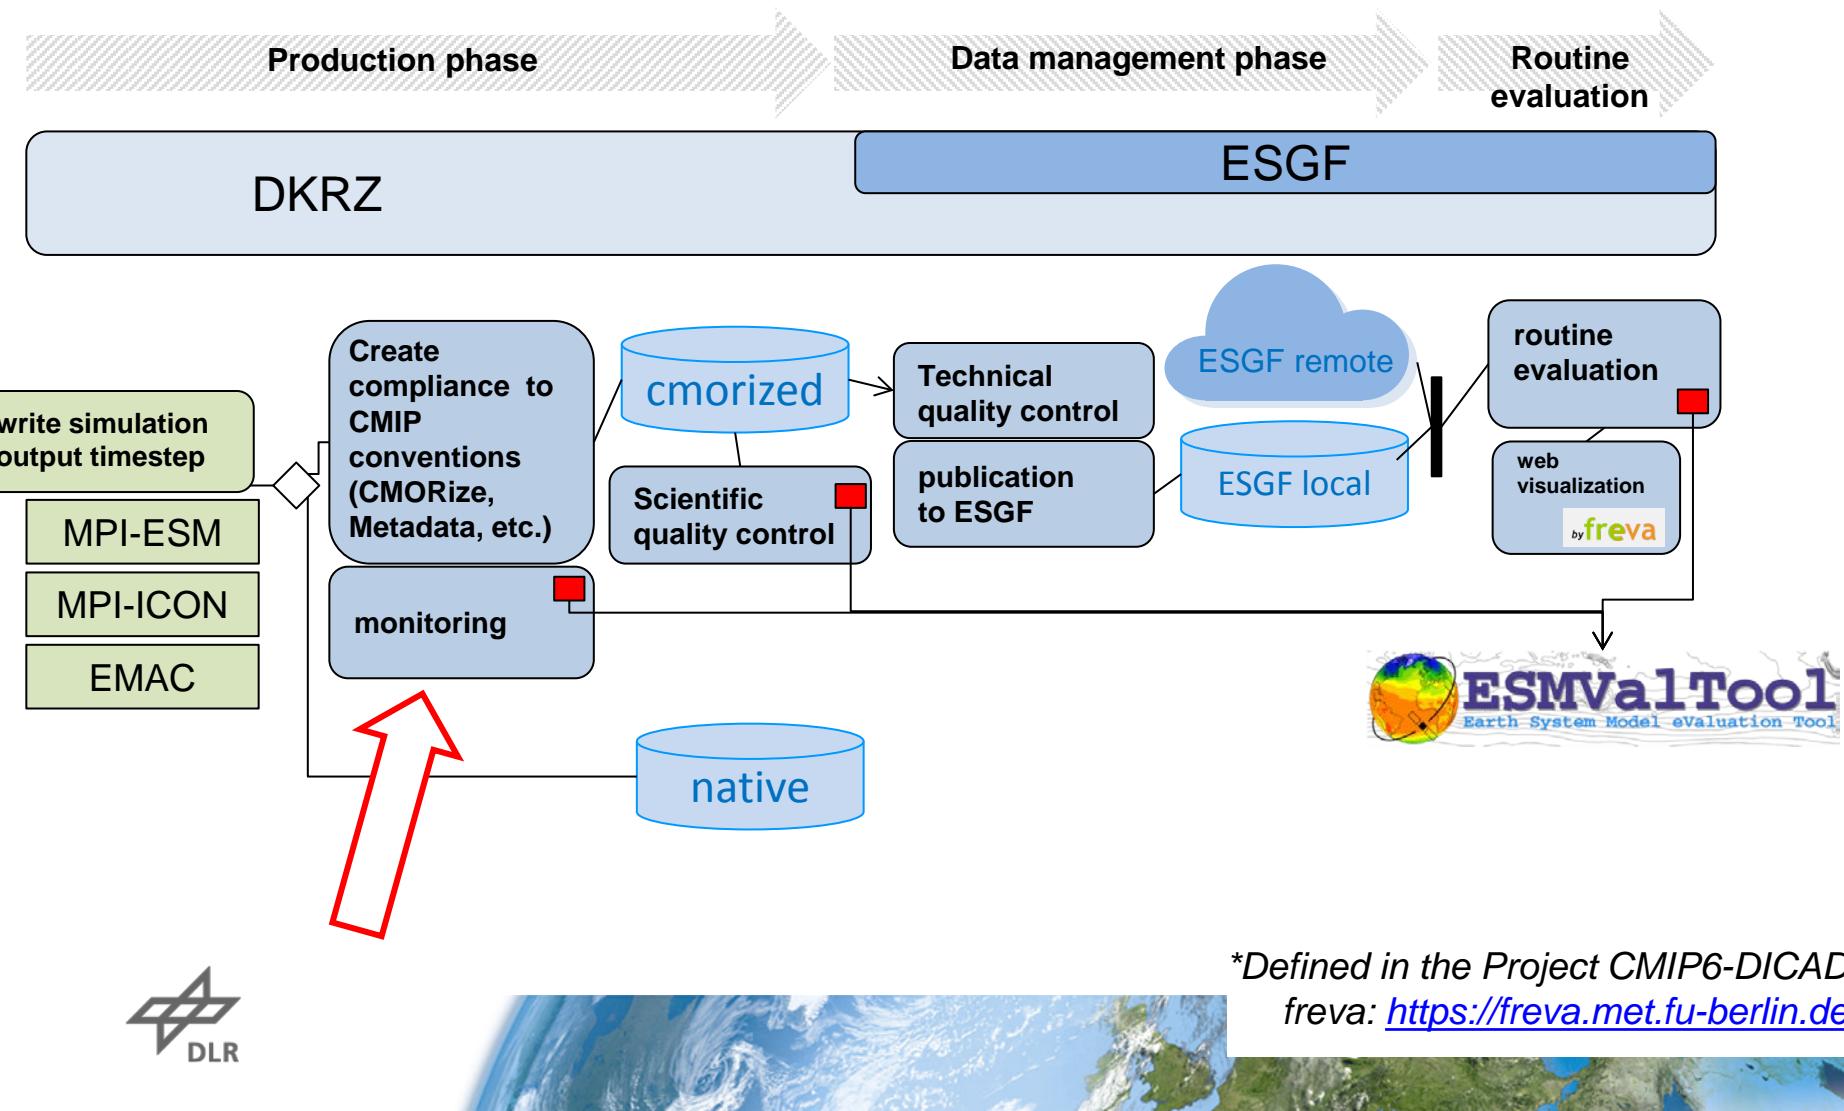

CMIP6 Historical Simulation (entry card for CMIP6)

- v. Historical simulation using CMIP6 forcings (1850-2014)

(2) Standardization, coordination, infrastructure, documentation

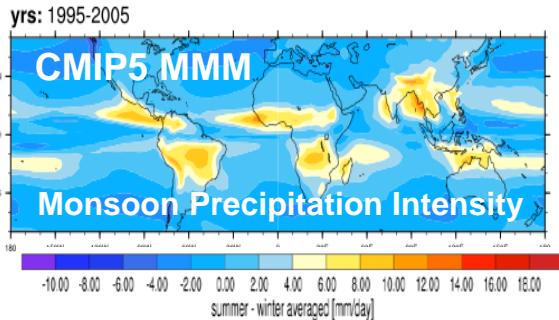

DECK (Diagnosis, Evaluation, and Characterization of Klima) & CMIP6 Historical Simulation to be run for each model configuration used in CMIP6-Endorsed MIPs

CMIP6 Workflow with the ESMValTool at the DKRZ*

Example diagnostics for the monitoring of historical and AMIP simulations

Similar to **Figure 9.7** of AR5

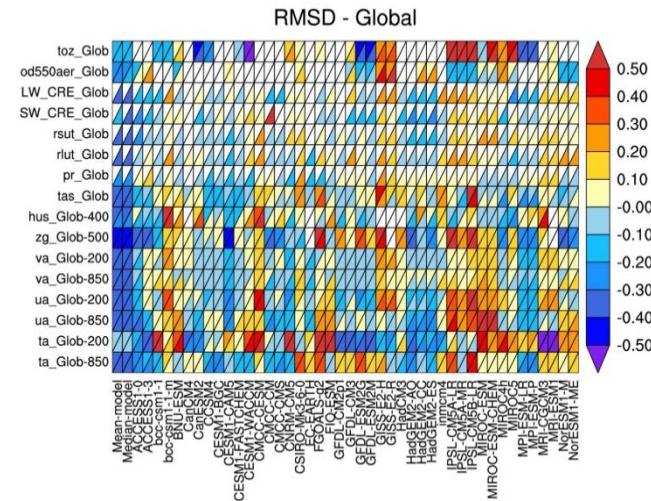

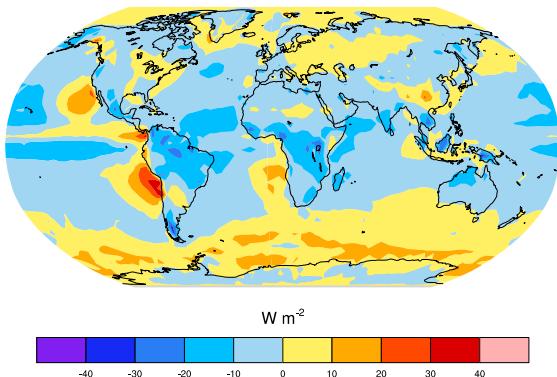

Broad Characterization of Model Behavior
(incl. IPCC AR5 Chap 9 & 12 diagnostics in ESMValTool)

Running alongside the ESGF

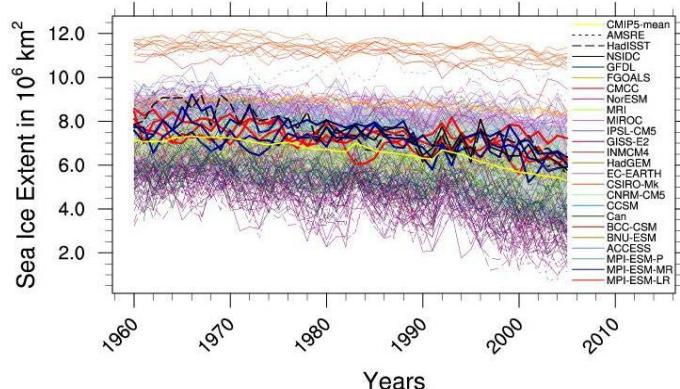

Similar to **Figure 9.5** of AR5

Net Cloud radiative effect against CERES EBAF

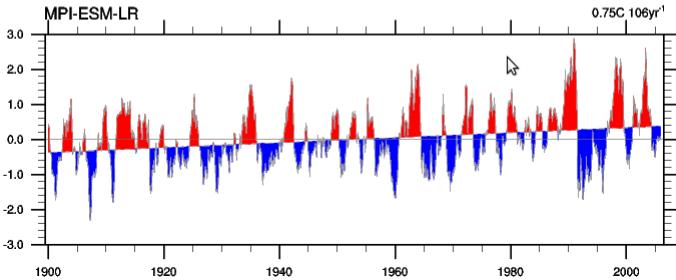

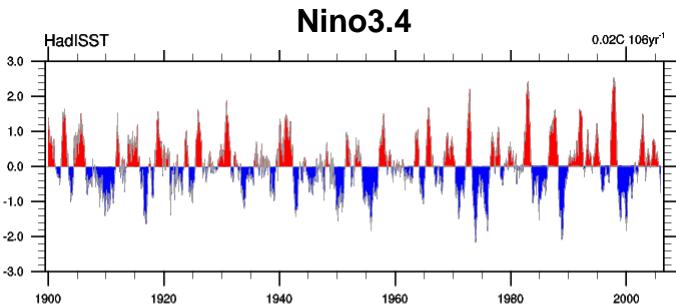

Similar to **Figure 9.24** of AR5

September Mean Arctic Sea Ice Extent

NCAR Climate Variability Diagnostic Package (CVDP)

Example diagnostic for the monitoring of idealized simulations: calculation of equilibrium climate sensitivity from piControl and 4xCO₂ simulations

Relationships between the change in net top-of-atmosphere radiative flux, N, and global-mean surface-air-temperature change, DT, after an instantaneous quadrupling of CO₂.

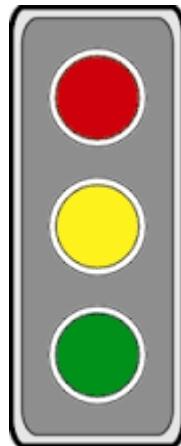

Monitoring of Emissions

- Anthropogenic Reactive Gas Emissions: SO₂, NO_x, NH₃, CH₄, CO, NMVOC, BC, OC
- Fossil Carbon Dioxide
- Open burning emissions: aerosol (BC,OC) and aerosol precursor and reactive compounds (SO₂, N₂O, NO_x, NH₃, CH₄, CO, NMVOC) and CO₂
- Land use
- GHG Concentrations
- Stratospheric Aerosols
- Ozone
- Nitrogen Deposition
- Solar
- AMIP Boundary Forcing: Sea Surface Temperature and Sea Ice Datasets

Monitoring: Dashboard

Warning system

- Check if gridbox values of variables lie in the range of valid min and valid max value given by CMIP6 data request (with contribution of Martin Juckes, CEDA)
(ta, tas, tos, pr, prw, ps, psl, ...)
- Other important checks:
 - radiation balance
 - global tracer mass
 - ... (further input of modeller groups is needed)

	Experiment	ta	tas	tos	ps	...	F_{net}
Run1	piControl				red				
Run2	historical								
...									

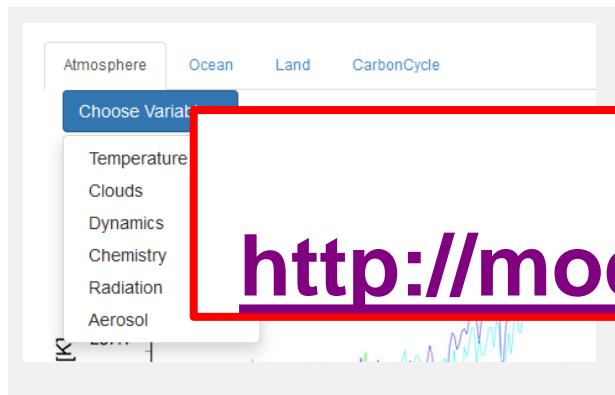

Monitoring: Dashboard

CMOR Variable	Title	Min	Max
clivi	Ice Water Path	-1.872e-06 s	1.535 s

Navigation:

Monitoring with ESMValTool

Advantages

- Direct comparison with observations and previous simulations
- Several additional diagnostics of the ESMValTool can be used in the monitoring (e.g. NCAR CVDP)
- Dashboard: fast detection of errors in the simulations
- New: monitoring of emissions

Way ahead

- First complete version should be finished by end of January for review by EMAC and MPI-ESM model groups
- Checks on the dashboard: further input from model groups needed

ESMValTool Related Milestones in CMIP6-DICAD

- Standardisierte Diagnostiken und Modellevaluation (AP6) -

- M1: Entwurf mit ausführlicher Spezifikation zum Portal [Monat 6, FUB]
- M2: Prototype ESMValTool Version läuft in der ESGF DKRZ Infrastruktur [Monat 9, DKRZ]
- M3: ESMValTool steht zur operationellen Laufüberwachung in der DKRZ Infrastruktur zur Verfügung [Monat 12, DLR] AP 6.2 Milestone
- M4: Lauffähiger und getesterter Prototype für das Portal [Monat 15, FUB]
- M5: ESMValTool mit erweiterten Diagnostiken auf CMIP5 Modelldaten angewandt [Monat 18, DLR]
- M6: ESMValTool mit CMIP6 Modelldaten und Beobachtungsdaten vollständig integriert in der ESGF DKRZ Infrastruktur [Monat 24, DKRZ]
- M7: MPI-ESM1/2 und EMAC2 mit erweiterter ESMValTool Version evaluiert und mit anderen CMIP6 Modellen verglichen [Monat 36, DLR]
- M8: Produktionssystem des Portals ist installiert [Monat 36, FUB]

=> Work in AP6.2 on time
