

ENES DTF Telco, 8. November 2018

Time: 14:00 - 15:30 CET

Attendees:

Michael Lautenschlager (DKRZ, Chair)
Bryan Lawrence (NCAS)
Sylvie Joussaume (IPSL)
Martin Juckes (BADC)
Sébastien Denvil (IPSL)
Frank Toussaint (DKRZ): excused
Stephan Kindermann (DKRZ):
Sandro Fiore (CMCC):
Wim Som de Cerff (KNMI): excused
Christian Pagé (Cerfacs)
Michael Kolax (SMHI): not attending
Francesca Guglielmo (IPSL): not attending

Discussion Topics:

- **Preparation of ESGF F2F in Washington (04 - 07.12.18)**

The pre-final agenda is given can be obtained from the ESGF web site <https://esgf.llnl.gov/esgf-media/2018-F2F/F2F-2018-Conference-Agenda.pdf>

The European contribution counts to 17 presentations out of 41 completed by 4 posters and structuring the complete session “Rethinking ESGF Architecture”

We agreed on three action items

1. Sylvie will prepare a first version of the ESGF keynote ENES contributions to ESGF starting from Sebastien’s presentation at the 2017 F2F. Michael to comment and to add.
2. The European contributions are requested to use a common first slide in their F2F presentations (Sylvie provides a template begin of next week). The DTF members share it to their colleagues with ESGF F2F presentations and inform them
3. Sebastien will ask Phil Kershaw to share to white paper on future ESGF architecture direction with the ENES-DTF for comment and preparation

- **IS-ENES3 kick-off (around 10.01.2019)**

Four types of sessions:

- 1) Keynote on ESGF, EOSC, Copernicus, etc
- 2) WPs activity presentation
- 3) Parallel sessions on data, model, etc. + wrap-up sessions
- 4) Plenary discussion on key topics like Sustainability, Stability of the infrastructure, etc.

Details on the presentation of data services and sustainability will be discussed at IS-ENES3 WPL telco next Thursday.

WPL telco on Nov 15, 2.00pm

Action: Double check costs for TNA activity: CMCC and IPSL to double check at their premises.

Additional discussion possibilities at kick-off

- Planning with respect to IS-ENES services evolution over next 3 years, architecture, what resources do we have ..
- Service activity planning and monitoring (<https://esgf.anl.gov/monitor/>), ...

- **Stability of ENES ESGF CMIP6 services**

C4i impact problems:

- Back online now, hosted on cloud resources
- → such problems should be communicated early in DTF
- → monitoring, status page would be useful
- No objections to advertise C4I portal as alternative CMIP6 data access interface even for a specific user community, the climate impacts scientists

Ec-earth node problems

- Issue with necessary old cmip5 data unpublication
- CMIP6 plans for EC-earth ?
- Action: Start Discussion with EC-Earth (Sebastien)
- Future Action (IS-ENES3): include in ENES strategy how to deal with such problems

- **AOB**

Sylvie: Question from EC Project officer Fabio Dalan (at "ClimatEurope Festival" through Francesca G.) on possibility for projects to put data on ESGF. IS-ENES3 should address the question, i.e. at least define the set of instructions/guidelines needed for projects that want to put their data on ESGF and what kind of support to providers IS-ENES3 can give. A topic for IS-ENES3 VA2 !
